

JOINT EVENT ON

6<sup>th</sup> European Conference on

**Predictive, Preventive and Personalized Medicine & Molecular Diagnostics**

&

**2<sup>nd</sup> World Congress on Human Genetics**

September 14-15, 2017 | Edinburgh, Scotland

**Silvia Binder**

*The Binder Institute for Personalized Medicine, Germany*

### Integration of personalized biomedical information therapy (Bio-IT) into daily practice

The realm of personalized Bio-IT is increasingly in demand by physicians/therapists and patients alike. Its foundation is as old as human history and with today's science and technology it is an available modality to integrate into any type of practice. Working with the energy of a human's body is a standard in diagnostics of all types of medical specialties. Diagnostically we measure pathology with technologies like MRI, EKG, EEG, Ultrasound, Thermography, and more. On the therapeutic side, the use of physics or energetics in combination with the chemistry model is still a blank area to many physicians' due to the lack of information during their primary education. The advanced physician/therapist is seeking the missing link to the chemistry model which is discussed here. The global trend proves patients are not only seeking but demanding less chemical and non-invasive solutions for their chronic illnesses. Moreover, patients are seeking physicians/therapists who recognize their personal needs and are able to offer personalized therapy solutions for getting and staying well.

### Biography

Silvia Binder, ND PhD is the CEO of the Ondamed Companies and the Founder of The Binder Institute for Personalized Medicine in Southern Germany where she helps chronically ill patients from around the world. She lectures around the globe, offers Courses on Bio-IT Integrative Personalized Medicine, is faculty of the American Academy for Anti-Aging Medicine and serves on several medical Advisory Boards in North America. She is the author of various scientific papers and the book "ONDAMED "A story of love, healing, and medical revolution".
