

2nd International Conference on Predictive, Preventive and Personalized Medicine & Molecular Diagnostics

November 03-05, 2014 Embassy Suites Las Vegas, USA

Advancement in personalized imaging

David Cheng

Sidra Medical and Research Center, Qatar

With continued advancement in personalized therapies in medicine, there is a need for improvements in diagnostic imaging. This talk will give a brief update in equipments (such as PET/MRI) and in biomarkers currently under investigation and being used in clinical practice.

Biography

David Cheng completed a PhD in Biomedical Physics from UCLA and a dual residency in Internal Medicine and Nuclear Medicine at Montefiore Medical Center, the hospital for the Albert Einstein College of Medicine in Bronx, NY. He has served as the Chief of Nuclear Medicine for more than 10 years at Yale-New Haven Hospital. He has joined Sidra Medical and Research Center in July 2014 as the Chief of Nuclear Medicine and Molecular Imaging to develop his own research.
