Ceramic veneers: Where to start from and how to decide

This presentation is designed for general dental practitioners to start from proper diagnosis and good case selection to definitive treatment plan through focusing on indications and contra indications of ceramic veneers. The principles in esthetic dentistry (smile analysis and smile design) with different approaches: Digital, conventional wax up, mockup will be discussed. This lecture will discuss types of preparation, the use of preparation index and impression techniques, temporization and finally detailed step by step bonding procedure and cementation techniques.
