## To lase, or not to lase integrating lasers to daily practice: A practical approach

**Premila Suganthan**

Annamalai University, India

**L**aser- A new technology in clinical dentistry is the answer to a lot of patients who wants bloodless, painless and less of or no anesthesia for their dental treatment. This presentation will highlight the use of hard and soft tissue lasers and its advantages over conventional methods in various dental applications and how it has evolved considerably as an adjunctive and alternative treatment to provide minimally invasive dental procedures. It will exhibit clinical cases done using laser in regular day to day procedure to provide a stress free dentistry for dental practitioners as a practice builder.

### Biography
