

Unusual site of Dermoid cyst in the Parotid gland; case report and review of literature

Dina Mohammed-Ameen

Al-Noor Specialist Hospital, Saudi Arabia

Dermoid cysts are extremely rare in parotid gland. In head and neck region they account's for 7% with the orbit and nose as most common areas. There are two theories regarding the origin of dermoid cyst; congenital and acquired. We are reporting an unusual case of dermoid cyst in the parotid gland of a 15year female and a review of the relevant literature.
