

## **Bio functional esthetics: What it really is?**

**Ady Bayer**

Tel Aviv University, Israel

**I**mplant dentistry is a growing field of the profession. There are many issues and problems that must be addressed as a part of the diagnosis and treatment of dentistry. In his practice, author utilizes different innovative techniques in rehabilitations from a noninvasive to a maximum intervention from No Tech to High Tech dentistry and all in the same mouth. Author is utilizing the help of world renowned Dental technicians. Author believes that every technician has their own style and signature which will work in harmony with the matched individual patient. Therefore the golden triangle, patient, doctor technician is a must. Being able to choose which tech will have the best effect on an individual patient is something being done regularly in the author's practice. In this lecture, the author will demonstrate his procedure.
