Bio-Medical Waste (Management & Handling) Rules 1998- A Guide to Practitioner

Girish Sogi Malleshappa
Maharishi Markandeswar University, India

It is about a decade and half since Bio-medical Rules were made applicable in India. There was no concept of Health care waste management (HCWM) in India before 1998. Implementation was expected within a time but extended up to December 2002; most of the health care institution and facilities are still to lay scientifically acceptable systems. One of the reason for this is occupiers (Health care facilities) remain ill-informed about the steps and rules involved in devising a proper systems.

Contents list:

1. Introduction
2. Overall Impact of Bio-Medical waste on Public health.
3. Sources of Bio-Medical waste.
4. Generation & Composition.
5. Treatment and disposal technologies.
6. Bio-Medical waste (Management & Handling) Rules.
7. Bio-Medical Waste management in Dentistry.
8. Conclusion.
