November 23-25, 2015 Bengaluru, India

Analysis of Contribution and types of research by Indian Endodontists in IEJ & JOE in last 6 years

Asmita Singh Gupta

Rungta College of Dental Sciences and Research, India

Scientific development is evaluated in each society through scientific activities of the researchers. Such evaluation is extremely necessary for re- search programming and implementation in each country . Scientometry is an important aspect in research and scientific production, so that production and use of information in different societies is considered as an index for national growth and development. This paper evaluates contribution and type of research published by various countries in comparison with India in 2 Indexed and impact factor Endodontic journals from 2009 to 2014.
