

10th Asia Pacific Global Summit on

HEALTHCARE

March 12-14, 2018 Singapore

4th health population nutrition sector program towards sustainable goal (SDG)

Md Saiful Islam

Directorate General of Health Services, Bangladesh

The 4th HPNSP (2017 to 2022) has been designed to incorporate appropriate strategies and activities for focused improvements in increasing access to and quality of health care and improving equity along with financial protection in order to meaningfully realize the objectives of universal health coverage (UHC) by 2030. The 4th HPNSP coincides with the adoption of the United Nations' SDGs by world leaders in New York on the 25 September 2015 and aimed at transforming the world by ending poverty, hunger and inequality, taking action on climate change and the environment and improving health and education. The objectives were: (1) To strengthen governance and stewardship of the public and private health sectors and undertake institutional development for improved performance. (2) To establish a high quality health workforce available. (3) To improve equitable access to and utilization of quality health, nutrition and family planning services.
