Technologist's view of healthcare innovation

Kishore Dharanikota

Plural Hub LLC, USA

Healthcare is transforming through process innovations, reorganizations, consumerization and payment reforms. At the same time, the trifecta of software infusion, digitization of offerings and ubiquity of information is fracturing industries around the world. Healthcare sector is no exception to following the suite of IT-centric drivers. The technology innovations are accelerating healthcare delivery transformation. Let's see how "Business Analytics, Big Data, Artificial Intelligence, Virtual Reality and Blockchain" are influencing healthcare.

Biography

Kishore Dharanikota has more than 18-years of success in client-centric, service-driven environments at various progressive management roles. He is a resourceful technical leader and solutions-driven strategist with a passion for leveraging emerging technologies to achieve key healthcare business objectives. He is experienced in leading complex solution delivery engagements for multiple innovative companies across various sectors including Healthcare, Logistics, Financial and Automobile. He takes a special pride in optimizing healthcare processes through technology innovation to improve quality at decreased cost. He is the Founder and Principal consultant of Plural Hub LLC. With years of experience in healthcare and other sectors, it is uniquely positioned to work on complex enterprise level technology solutions and provide advisory services through our deep process experience. He co-authored a book on IT Systems integration, "BizTalk 2013 Recipes A Problem Solution Approach" published through Apress publications.
