CONNECTED CARE: BRING TOGETHER A NETWORK OF HEALTHCARE PROVIDERS AND PARTNERS TO IMPROVE HEALTH OUTCOMES

An integrated health care system across the continuum of care enables multiple technology platforms and software applications to be connected, communicate, and exchange data. Information exchanged includes orders, therapy documentation, pre-move in data, and census information as well as continuity of care documents using clinical document architecture specifications. An enabling health integration solution brings together a network of healthcare providers and partners to ensure the right information at the right time to make the best care giving decisions for seniors.

Biography

Dan Levitt shepherds the enhancement of social, spiritual and care needs for more than 300 seniors, inspiring a team of over 400 employees and volunteers with a commitment to continuously improving quality of life. Dan is an Adjunct Professor in Gerontology teaching Long Term Care Administration at Simon Fraser University. His adventure exploits have taken him from Africa's highest peak Mt. Kilimanjaro to the Caribbean Sea's Planacar Reef, from canoeing across the Yukon to racing in the Boston and New York Marathons. Dan has appeared on television and radio as well as authoring many articles in newspapers and professional journals. His insights on seniors care leadership are sought after at events across Canada, the United States, Europe, Asia, Australia and New Zealand.
