

## 16th Edition of European Gastroenterology and Hepatology Congress Scheduled during June 15-16, 2020 in London, UK

Dr. C Gregory

Diseases affecting the gastrointestinal tract, which include the organs from mouth into anus, along the alimentary canal, are the focus of this speciality. Physicians practicing in this field are called gastroenterologists. They have usually completed about eight years of pre-medical and medical education, a year-long internship (if this is not a part of the residency), three years of an internal medicine residency, and two to three years in the gastroenterology fellowship. Gastroenterologists perform a number of diagnostic and therapeutic procedures including colonoscopy, endoscopy, endoscopic retrograde cholangiopancreatography (ERCP), endoscopic ultrasound and liver biopsy. Some gastroenterology trainees will complete a "fourth-year" (although this is often their seventh year of graduate medical education) in transplant hepatology, advanced endoscopy, inflammatory bowel disease, motility or other topics.

Gastroenterology emphasizes on digestive system and its disorders which includes alimentary canal. It involves a comprehensive understanding of the physiology of the gastrointestinal organs, including the motility of food through the stomach and intestine, the digestion and absorption of nutrients into the body, removal of waste out of the system, and the function of the liver as a digestive organ. Advancement in the diagnosis and treatment of gastrointestinal diseases has been noteworthy in the recent years. The investigation is going on with the new diagnostic procedures and novel therapeutic approaches for gastroesophageal reflux disease (GERD) and pancreaticobiliary.

The post-surgical problems, Barrett's Oesophagus, neuroendocrine tumours, and gastrointestinal stromal tumours are also the diagnostic procedures. Hepatology is the branch of medicine that incorporates the study of liver, gallbladder, biliary tree, and pancreas as well as management of their disorders. Although traditionally considered a sub-specialty of gastroenterology, rapid expansion has led in some countries to doctors specializing solely on this area, who are called hepatologists.

The Facts and Facets of Gastroenterology and Hepatology and the most recent research are going to be illustrated by Eminent Scientists/ Research Professors in the field Gastroenterology and Hepatology, Junior/Senior research fellows, Students, Directors of Gastroenterology and Hepatology research companies, Members of Gastroenterology and Hepatology associations and exhibitors from health Industry/Plastic Industries to magnifying scientific knowledge by sharing the research and ideas. After our 15<sup>th</sup> International Conference on Gastro Education", successfully completed on June 17-18, 2019 in Tokyo, Japan So we are looking forward to continuing our success and we once again taking the liberty to welcome you at our new destination in London, UK from June 15-16, 2020 for our coming Event 16<sup>th</sup> Edition of European Gastroenterology and Hepatology Congress organizing by EuroScicon Pvt Ltd. (Gastroenterology and Hepatology).

On the behalf of our OCM Dr. C Gregory, from University of California, Irvine, United States we cordially invite all the participants from all around the world to take part in this esteemed conference. Join us to witness invaluable scientific discussions and add to the future advancements in the field of Gastroenterology and Hepatology in the upcoming "16<sup>th</sup> Edition of European Gastroenterology and Hepatology Congress" is going to be held on June 15-16, 2020 in London, UK.
