The journal established in 2010 is currently running Volume 12, issue 7. The previous volume 12, issue 4 discussed about various aspects regarding the journal scope. The issue consisted of 5 different types of articles (Editorial, Editorial, Image Article, Short communication and Perspective article) which are available freely in online with high quality peer reviewed articles. Authors from different region of world contributed their research work to our journal which helped to gain a potential impact and emerging new concepts to the readers.

Dr. Elena Ayaz, described about the Diagnosis and Treatments of Chronic Obstructive Pulmonary Disease in his editorial article entitled "Diagnosis and Treatments of Chronic Obstructive Pulmonary Disease". In which the author described about the essential instances of chronic inflammatory lung disease that causes discouraged wind stream from the lungs. Manifestations incorporate breathing trouble, hack, liquid body substance (sputum) creation and wheezing. It's ordinarily brought about by long haul mopenness to bothering gases or particulate matter, regularly from tobacco smoke.

Dr. Raffaele Pezzilli in his Image article entitled "A Rare Case of Ileitis and Colitis" explained about the A seventy seven-yr-old male affected person, non-smoker and eating 50 gr of pure alcohol/day, skilled a seven Kg weight reduction and 4-five bowel moves in line with day with the greasy and foul-smelling stools. He had arterial high blood pressure treated with olmesartan 20 mg according to day for the preceding 5 years. Both coprocultures and examinations for parasites were negative; a

colonoscopy became ordinary and histology showed a collagenous colitis.

Dr. Julie C. Brown in her Perspective "Immunotherapy and Its Treatments". The T lymphocyte, particularly its ability for antigen-coordinated cytotoxicity, has turned into a focal concentration for connecting with the insusceptible framework in the battle against malignancy. The plan to send the insusceptible framework as an instrument to treat neoplastic sickness. Immune system to forestall carcinogenesis in a way like joins rejection. Useful invulnerable reactions following tumoural receptive exchange in mice and clinical reports of unconstrained relapse of melanoma in patients with attendant immune system sickness.

A Short communication entitled "Food Allergy: A Review and Update on Hypersensitivity" was written by Dr. Julie C. Brown about the Food hypersensitivity is a unusual safe response to food. The indications of the easily affected reaction might go from gentle to extreme. They might join bothering, developing of the tongue, spewing, free insides, hives, burden breathing, or low heartbeat. This routinely occurs inside the space of minutes to a couple of long periods of receptiveness. At the point when the indications are extreme, it is known as hypersensitivity.

Dr. Roohi Rasool explained about the LATEX: Bane or Boon in Health Care in editorial article entitled "LATEX: Bane or Boon in Health Care". Allergic reactions because of natural rubber latex during any surgery can be lethal. It is required to appropriately determine the patients to have such sorts of sensitivities. An assignment council can be framed to assemble the rundown of materials containing latex during surgeries, intra venous implantations and actual assessments. A Standardized working technique (Sop's) ought to be set up in the working room in the event of perioperative hypersensitivity and ought to be over and over continued in clinical practice.
