

## Annual Midwifery and Paediatric Nursing Congress

### Dr. Eric Bowman

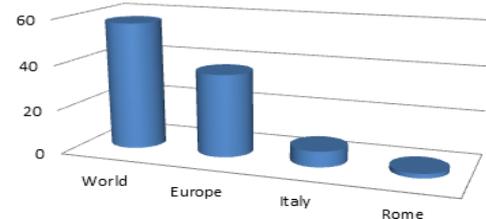

A nurse-midwife is a licensed healthcare expert who focuses on women's reproductive health and childbirth. In addition to attending births, they carry out annual assessments, give counselling, and write prescriptions. Nurse-midwives have a selection of responsibilities which include: Attending births Performing gynaecological checks, Providing circle of relatives making plans offerings, prenatal care, and parent schooling.

Giving primary care, particularly for reproductive fitness nurse midwife's responsibilities: Measure and screen fetal development, Give prenatal, intrapartum, postpartum, and new born care, Educate expectant or new dad and mom on nutrition, Maintain clinical records and collaborate with healthcare professionals in supplying specialised care, Keep updated on medical breakthroughs in reproductive or delivery-associated medical strategies, Offer schooling programs Nurse midwives use a number of equipment in presenting offerings, such as blood pressure video display units, thermometers, forceps (e.g., curved, obstetrical, ring, tissue), haemostats, lancets, syringes, needle holders, and surgical scissors.

Paediatric nursing is the hospital treatment of neonates and kids as much as childhood, normally in an in-affected person medical institution or day-clinic. Paediatrics comes from the Greek words 'paedia' which means that infant, 'iatrike' which means that medical doctor. Nurses who specialise in paediatrics devote their understanding and abilities to caring for youngsters from infancy via the late teen years and their families. These specialized nurses typically entire superior education in paediatrics and collaborate closely with physicians and different health care companies who proportion their determination to children's fitness.

Paediatric nurses are generally Registered Nurses (RN) or Advanced Practice Registered Nurses (APRN), who determine to pursue uniqueness schooling in paediatrics. Doing so let's in them to tackle roles in which they are able to work particularly with babies, babies, tweens, and teenagers. Paediatric RNs may work in a hospital's paediatric department, for example. There are also Paediatric Nurse Practitioners (PNP) who take on extra obligations along with prescribing medicines, performing developmental screenings, and administering
