

Chakras energies deficiencies as the main cause of myocardial infarction without arterial obstruction

Huang Wei Ling

Medical Acupuncture and Pain Management Clinic, Brazil

Abstract

Myocardial infarction with non-obstructive coronary arteries (MINOCA) is the term currently used to describe patients presenting with clinical features of an acute myocardial infarct (MI) but without evidence of obstructive coronary artery disease (CAD) on coronary angiography. The causes in Western medicine are divided in coronary causes and non coronary causes.

Purpose: is to demonstrate another possible cause of non coronary myocardial infarction that is related to energies deficiencies in the Chakras energy meridian, not visible by the naked eyes.

Method: a case report of a 60 year-old-women, with a history of pain in the chest and irradiation to the left upper limb in December 2019 . She went to a hospital and was submitted an exams that demonstrated alterations in cardiac enzymes. The doctors decided to submit her to a coronary angiography that resulted in normal exam. After two months, she had another episode of chest pain and was submitted to the same coronary angiography and they decided to put a stent.

Results: All her chakras were completely depleted in energy and the doctor begin to treat these energy deficiencies with homeopathy according to the theory created by her Constitutional Homeopathy of Five Elements Based on Traditional Chinese Medicine and crystal based medications.

Conclusion: the conclusion of this study is that, the possible factor that had induce the myocardial infarction in this patient was the complete lack of energy in all her chakras, leading to stagnation of Blood in the coronary arteries.

Biography:

Huang Wei Ling, born in Taiwan, raised and graduated in medicine in Brazil, specialist in infectious and parasitic diseases, a General Practitioner and Parenteral and Enteral Medical Nutrition Therapist.
