

## Conference Announcement on Future of Cloud Computing

Alberto E. Musto

We are pleased to welcome you to the “**Future of Cloud Computing**” after the successful completion of the series of cloud Congress. The congress is scheduled to take place in the beautiful city of Tokyo, Japan, on September 24-25, 2020. This Cloud Computing 2020 conference will provide you with an exemplary research experience and huge ideas.

The perspective of the [Cloud Computing](#) Conference is to set up technology research to help people understand how Technology techniques have advanced and how the field has developed in recent years.

[Cloud Computing](#) is the study of injuries, disorders, diagnosis and treatment of the brain, spine and nervous system including their coverings, blood vessels, and all effector tissues. There are more than 600 known [Neurological Disorder](#) which affects our nervous system severely but still for most of the diseases treatment options are very limited and research is going on. According to a global study conducted by WHO 8 out of 10 disorders are neurological problems in which 3 are the highest disability classes. Every year 6.8 million people are dying all over the world due to neurological disorders or injury. In Europe, nearly 38% of the total population is suffering from a brain disorder and in United States Stroke is the third leading cause of death.

Global “[Cloud Computing Market](#)” is a professional and detailed study on the Cloud Computing business. The report monitors the key trends and market drivers in today's situation and offers on the ground insights. Global Cloud Computing Market report also presents you analysis of market size, share, and growth, trends, and price structure, statistical and detailed data of the worldwide industry. Additionally Cloud Computing Market 2019 research report offers key analysis on the industry status of the Cloud Computing producers with market size, growth, share, trends as well as business price structure.

[Cloud Computing Global market](#), especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. More and more people are eager for fashion, which also promotes the consumption of fashion. The dynamics of the apparel industry are changing dramatically.

the SaaS segment had a significant market share, and this trend is expected to continue over the forecast period. The use of SaaS eliminates the expenses and complexities associated with purchasing, configuring, and managing hardware products. This will play a significant role in the SaaS segment to maintain its market position. Also, our global cloud computing market report looks at factors such as the increased inclination toward cloud computing for cost-cutting, control of data backup and recovery, and increased use of containers boosting [cloud adoption](#).

[Cloud Computing](#) works as a consultant and principal physician for patients with primary nervous system disorders including various diseases like Parkinson's disease, multiple sclerosis, Alzheimer's disease, epilepsy, migraine, cerebrovascular disease, movement disorders, and neuromuscular disease. To enhance the field and make people aware of it. The organizing committee decided to hold a conference. Cloud computing is one of the fast growing and developing areas of surgery.

People who have missed attending the past conference are most welcome to present your research ideas at the 2020 [Cloud Computing conference](#). This conference will help you improve networking with eminent people in the field of Neurology
