

Create a stress-free environment with the help of quantum technologies for the development of your child's full potential!

Jacqueline Jacques

BioQuantique SARL, Switzerland

Abstract

During the first months and years of life, all contact, movement and emotion result in intense electrical and chemical activity in the brain, where billions of cells organize themselves into networks connected by trillions of synapses. During this period, experiences and interaction with parents, family members and other adults are as important to brain development as other factors such as adequate nutrition, good health and clean environment. This early stage of development is critical to a child's success in school and achievement in adolescence and adulthood.

The brain's malleability during these early years also means that stressors such as lack of essential care, hunger, and abuse can compromise the child's brain development. Indeed, the confidence, curiosity, willpower, self-control, relationship-building, communication and cooperation skills that make up the emotional intelligence that children need to learn and to integrate into school and life in general depend on the care they receive from their parents, teachers and other caregivers. A stress-free environment is critical for the child!

The most influential perceptual programming of the subconscious mind occurs from birth through age six. By observing the behavioral patterns of people in their immediate environment—primarily parents, siblings, and relatives—children learn to distinguish acceptable and unacceptable social behaviors. It's important to realize that perceptions acquired before the age of six become the fundamental subconscious programs that shape the character of an individual's life. Children are the world's most valuable resource and its best hope for the future!

Technologies exist today to help parents to manage Stress and to raise beautiful & healthy children in a Stress-free environment! Discover the QUEX Quantum Technologies & Therapies based on Quantum Physics, Biofeedback and Bioresonance that have been designed to detect and reduce STRESS at all levels (physical, mental, emotional, social, and environmental). These technologies offer over 500 assisted-by-computer Biofeedback therapies that are holistic, personalized, efficient, safe, painless, drug-free, without side-effects, in harmony with the environment and scientifically proven, combining both Eastern and Western philosophies and techniques!

Biography

Jacqueline Jacques has more than 30 years of experience as a Manager, Management Consultant, and Coach mainly in Canada, USA, France Hong Kong and UK. She trained from experts and teachers in Personal Development and Alternative Medicine in Europe, America and Asia. She is a Lecturer, Seminar leader, Coach and Quantum Biofeedback & Bioresonance Expert promoting Quantum Technologies & Therapies and training & coaching practitioners in their understanding and practice of this new approach to health and wellness. She is the founder of BioQuantique SARL (Geneva).
