ABSTRACT

LONGDOM Publishing is now handling the Journal of Patient Care with quality publication work. The Managing Editors play a key role in progressing the quality work from beginning of gathering the manuscripts till the paper publication through newly introduced various ways by following the strict guidelines of minimum 21 day peer review and revision process. The Journal of Patient Care is receiving lot of attention and importance during this Covid-19 pandemic as patient care has become the major priority during illness. However patient care is the focus of many disciplines- medicine, nursing, pharmacy, nutrition, therapies such as respiratory, physical, occupational and others. Although the work of the various disciplines sometimes overlaps, each has its own primary focus, emphasis, and methods of care delivery. In all disciplines, the quality of clinical decisions in part on the quality of information available to the decision-maker. Our journal is providing open access to all the readers and helping to gather more information regarding patient care and the importance of essential health care during COVID-19 pandemic through the various articles published in our journals enhancing the safety measures of the individuals.

Key words: Journal of patient care; Covid-19; Open access publications; Editorial coordinator; Editorial-in-chief; Reviewers; Editors

INTRODUCTION

LONGDOM Publishing is now handling the Journal of Patient Care with quality publication work. The Managing Editors play a key role in progressing the quality work from beginning of gathering the manuscripts till the paper publication through newly introduced various ways by following the strict guidelines of minimum 21 day peer review and revision process. The Journal of Patient Care is receiving lot of attention and importance during this Covid-19 pandemic as patient care has become the major priority during illness. However patient care is the focus of many disciplines- medicine, nursing, pharmacy, nutrition, therapies such as respiratory, physical, occupational and others. Although the work of the various disciplines sometimes overlaps, each has its own primary focus, emphasis, and methods of care delivery. In all disciplines, the quality of clinical decisions in part on the quality of information available to the decision-maker. Our journal is providing open access to all the readers and helping to gather more information regarding patient care and the importance of essential health care during COVID-19 pandemic through the various articles published in our journals enhancing the safety measures

of the individuals. The Journal of Patient Care is providing and excellent platform for all the Research scholars scientists and Doctors and Professors to express their personal and experimental opinions and ideas followed with their respective work to be known to others through their valuable Manuscripts and Full length articles in our respective journal and creating the readers an awareness and providing valuable insights to the budding students. The process of care begins with collecting data and assessing the patient's current status in comparison to criteria or expectations of normality. Through cognitive processes specific to the discipline, diagnostic labels are applied, therapeutic goals are identified with timelines for evaluation, and therapeutic interventions are selected and implemented. Patient care is a multidisciplinary process centered on the care recipient in the context of the family, significant others, and community.

are in a hospital setting may be classified into many types. Some of them may include:

Ambulatory care, Acute and Critical care, Home health care, Long term care, Nursing care, Perinatal care.

As an increasing proportion of population and with the shift

in disease patterns from acute illnesses, the traditional disease management and care focus of the health care professions has expanded. The health care focus must center more on prevention, health promotion and management of chronic conditions than in previous times.

Journal of Patient Care (JPC) provides the rapid publication of articles in all areas related to Patient Care & Health Care. JPC welcomes the submission of manuscripts that meet the general criteria of significance and scientific excellence. Papers will be published approximately 15 days after acceptance.

As a leading publisher of trusted science, technology, medicine research, Longdom Publishing SL is committed to help public health authorities, researchers, clinicians and the general public to manage the spread of COVID-19. Following an outbreak of pneumonia, a novel strain of coronavirus (2019-nCoV) was detected in December 2019.

We have made the relevant research articles, special issues and entries in our major journals freely available below, in support of the global efforts in diagnosis, treatment, prevention and further research into COVID-19 and similar viral respiratory infections. Our approach is to use the world-class information we have available to directly improve health and to support the virtual efforts of healthcare practitioners globally. We also continue to work directly with our community to support teachers, lecturers, librarians, students and institutions in their work. We are continually monitoring the developments and we will update the content of this page periodically.

Journal of Patient Care brings articles in all areas related to Advances in patient caring, health care, Patient education, Patient safety, Patient satisfaction etc, on issue basis. J Pat Care welcomes the submission of manuscripts that meet the general criteria of significance and scientific excellence. Papers will be published approximately 15 days after acceptance.

All works published by Longdom Publishing are under the terms of the Creative Commons Attribution License. This permits anyone to copy, distribute, transmit and adapt the work, provided the original work and source is appropriately cited. Journal of Patient Care strongly supports the Open Access initiative. All published articles will be assigned DOI provided by Cross Ref. Journal of Patient Care will keep up-to-date with the latest advancements in the field of Patient Care. Abstracts and full texts (HTML, PDF and XML format) of all articles published by Journal of Patient Care are freely available to everyone immediately after publication. Journal of Patient Care supports the Bethesda Statement on Open Access Publishing.

Longdom Publishing SL is using Online Review and Editorial

Tracking Systems for quality review process. Editorial Tracking System is an online submission and review system, where authors can submit manuscripts and track their progress. Reviewers can download manuscripts and submit their opinions. Editors can manage the whole submission/review/revise/publish process. Publishers can see what manuscripts are in the pipeline awaiting publication. E-mail is sent automatically to concerned persons when significant events occur.

The complete details about the journal can be seen at: <https://www.longdom.org/patient-care.html> For contacting us, mail us or Whats App us.

Lastly, Journal of Patient Care is nothing without the continuous support of the Editorial Board Members especially our Editor-in-Chief Jongwha Chang. The Editorial Board members are the back bone of the journal. Along with them, authors and reviewers play a very significant role in building this journal.

So, as an Editorial Co-ordinator I invite all the extended dignitaries in this field to submit their articles for bringing this research/expertise to the global scientific community.
