

## Editorial Note for Proposing the Special Issue “Severity of COVID Infection and Elder Care”

Pandey AK\*

University of Health Sciences, Center Lubbock, Texas, USA

### EDITORIAL NOTE

Form last 6 to 8 months the novel coronavirus disease (COVID-19) is rapidly spreading throughout the world and became pandemic. As per the report of World Health Organization (WHO) it is a severe acute respiratory syndrome-related coronavirus. It has been found that this disease may cause severe impact on immune deficient patients or less immune persons. Due to some physiological, pathophysiological changes, the comorbidities will increase with age of a person's and makes them susceptible towards most of the infectious diseases. As per the knowledge and WHO report the persons whose age is >60 has high risk of causing corona infection.

By considering the pandemic situation, we are pleased to present this Special Issue entitled “*Severity of COVID infection and elder care*” which focuses on key leading areas of psychological, clinical and social changes along with preventive protective measures for older adults towards corona infection.

Authors are warmly invited to submit their current research

activities and outcomes in the form of any article type of scientific communication such as Case reports, image articles, research articles, review articles, mini review, expert opinion, commentary, short note, graphical abstract, video article towards our Journal.

The manuscript submitted towards the special issue was peer-reviewed by the standard peer-view process. The aim of the journal is to focus the ever-growing scientific, industrial, medical and socio-economical interest in the field of ageing and its related fields.

One can submit their research work towards our special issue using our online standard editorial tracking system <https://www.longdom.org/submissions/gerontologygeriatric-research.html> or forwarded to the editorial office at [gerontology@medicineinsights.com](mailto:gerontology@medicineinsights.com).
