

## ***Encyclopedia of Nature of Spread and ratio of casualties in different regions of world due to COVID-19, and reasons behind discrimination of its spread and loss in different countries***

Abdulrehman Khursheed

University Of Sargodha, Sargodha, Punjab, Pakistan

### ***Abstract***

Encyclopedia of discriminated behaviour of COVID-19 in different regions of world. Why it is showing so adverse behaviour in some countries while, some countries are showing very little or no care about COVID-19 despite that there is no any effect on these countries. There are some reasons and there are some specific countries where COVID-19 showing very bad behaviour. On my twitter account a month before i posted that sooner russia will struck completely with COVID-19 at that time there were less than 1000 cases in Russia now check COVID-19 is grabbing Russia completely. There are some other countries where Covid-19 will exert lasting effect in upcoming weeks. I'll describe about countries too and will give some reasons and justifications. Moreover there are some specific people regardless the age factor regardless aged factor whom COVID-19 killing while some specific people are recovering despite the age of 55+. I'll give my reasons why this is so happening. Further countries with very best healthcare facilities possessing much death ratio than the countries with less or average healthcare facilities. I'll describe all about these and many other points

[30th International Conference on Psychology, Psychotherapy and Mental Wellness](#); August 31-September 01, 2020
