Editor's Note

Journal of Gerontology & Geriatric Research is an open access, peer reviewed international medical journal that publishes recent advances in the fields of Gerontological Nursing, Geriatric Care management, Geriatric Physical Therapy, Geriatric Psychiatry, Geriatric Internal Medicine, Geriatric Palliative Care and Clinical Geriatrics etc. The current special issue had published two research articles three commentaries and a case report.

Saxena et al. published a hospital based prospective study in acute stroke patients. authors concluded that in hospitalized stroke patients prolonged length of stay (>7 days) is related to low Glasgow coma scale scores and location of lesions and authors also found that the complications during hospitalization such as pressure-sores and sepsis are the main reasons for the prolonged stay in stroke patients [1]. In the research article, Niederstrasser et al. discussed the efficiency and suitability of various therapies for individualized or group-based approaches, and their possibility for computerization in the treatment of dementia [2].

Weusten et al. reported attention deficit hyperactivity disorder in 80-year old former veterinarian [3]. Chauhan et al. in their commentary

article discussed the role of personalized medicine and treatment in geriatrics and hypertension in aged [4,5]. Oluwagbemiga described the role of Medical Social Workers in geriatric health [6].
