

## Global Technics Approaches of Geriatrics and Ageing

Gerald Tan

Senior Consultant Urologist and accredited Robotic Surgeon, Tan Tock Seng Hospital, Singapore, E-mail: mail@geraldtan.com

### Market Analysis:

Aging Meet 2019 is a unique forum to share and gain knowledge in the field of Aging and Gerontology. The main aim of this conference is to stimulate new ideas for Promoting Healthy Aging.

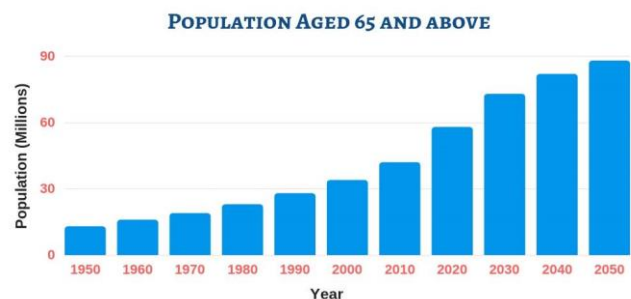

Aging Meet 2019 mainly aims to bring Global-renowned speakers, Geriatricians, Geriatric Physicians, Doctors, Professors, Social workers, Health care administrators, Geriatric Care Managers, Nurses, Palliative care specialists, Researchers and Students from different geographic regions can share their valuable insights on the advancements in the field of Aging, Geriatrics and Gerontology.

Aging is the practice of becoming older. The term Aging refers significantly to Homo sapiens, several animals, and fungi, bacterium and perennial plants. Aging may also be brought up as single cells among associate organism that have ceased dividing (cellular senescence) or to the population of a species (population aging). In humans, aging represents the amassing of changes in a human being over time, including social, psychological and physical changes. Aging is amongst the greatest known risk factors for most human diseases. Roughly one hundred fifty thousand die day after day across the world, about two-thirds die from age-related causes. Gerontology specifically states the study of psychological feature, social, psychological, cultural and biological aspects of aging. It is distinguished from gerontology, the branch of medication that focuses on the treatment of prevailing unwellness in older individuals.

This event can wear down the analysis and method of aging, so-called Gerontology. This field of science majorly focuses on Senescence, Aging Demographics, and social theories of geriatrics, Bio-gerontology, Environmental geriatrics, Life extension science (anti-aging medicine), Experimental geriatrics, and medical speciality geriatrics.

### Global Analysis:

Global gerontology/ aging market is expected to witness a healthy growth over the forecast period owing to significant factors such as increasing geriatric population and constantly improving geriatric care management services infrastructure. Furthermore, growing demand for aging studies and gerontology graduate programs and favourable government initiatives are the major factors contributing to the development of gerontology/aging market. Additionally, the availability of various care homes, adult day care centres, assisted living and nursing homes are one of the critical success factors for the growth of the market over the forecast period. Gerontology has immensely gained importance in educational institutions, healthcare centres and research institutes investigating the multidisciplinary aspects associated with the geriatric population.

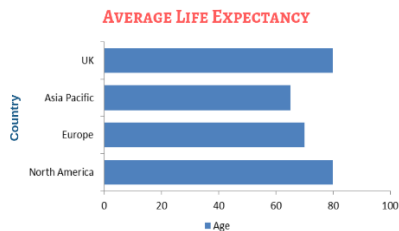

### Regional Analysis:

Geographically, North America accounts for one of the largest markets followed by Europe. Baby boomers play a major role in market growth. According to the U.S. Census Bureau, the average life expectancy in the U.S. will be 77.1 years for men and 81.9 years for women by 2020. To tackle the rising aging population, favourable reimbursement policies and extensive presence of care centres are set up to assist the problems faced by aged people. Asia Pacific is anticipated to be the fastest growing region due to the factors such as the rise in persistent medical conditions and rising concern for life expectancies among the geriatric population. Latin

America holds a strong potential for the market growth owing to the high presence of geriatric population and growing health care facility.

### Target Audience:

- Geriatricians
- Physicians
- Geriatric Physicians
- Medical Directors
- Dental Professionals
- Geriatric Doctors
- Ophthalmologists
- Rheumatologists
- Clinical Geriatrics
- Geriatric Nurses
- Pulmonologists
- Pharmacists
- Geriatric Specialist
- Occupational Therapists
- Healthcare Faculty
- Social Workers
- Community care coordinators
- Palliative care specialists
- Students and others interested in the field of Geriatrics

### Related Companies/Industries:

- Aldi
