

Impact of Covid 10 Pandemic on Education System in India and World wide

Kamal Gulati

Associate Professor at Amity University, Noida India

Abstract:

The COVID-19 pandemic has affected educational systems worldwide, leading to the near-total closures of schools, universities and colleges. Most governments around the world have temporarily closed educational institutions in an attempt to contain the spread of COVID-19. As of 4 September 2020, approximately 1.277 billion learners are currently affected due to school closures in response to the pandemic. According to UNICEF monitoring, 46 countries are currently implementing nationwide closures and 27 are implementing local closures, impacting about 72.9 percent of the world's student population. 72 countries' schools are currently open. Coronavirus pandemic has significantly disrupted various sectors in India including oil and gas, automobiles, aviation, agriculture, retail, etc. We can't ignore that hardly a sector would remain unaffected by the crisis. The impact may be more or less. Same is with the education sector in India. Let us find out the impact of coronavirus on education in India with some possible solution. As we know that due to coronavirus pandemic the state governments across the country temporarily started shutting down schools and colleges. As per the present situation, there is an uncertainty when schools and colleges will reopen. No doubt, this is the crucial time for education sector because entrance tests of several universities and competitive examinations are held during this period. Along with them how can we forget about board examinations, nursery school admissions, etc?
