

Longterm Toxicity of Herbicide use : Upcoming Special issue

Herbicides are chemicals that kill plants or prevent them from growing. Their method of killing plants is as varied as the plants they kill. The first step in understanding herbicides is to read the label. Labels tell you how to use herbicides safely and effectively. It is illegal to use herbicides for any purpose or by any method other than as indicated on the label.

Here are some tips to help you use herbicides safely and effectively:

- Avoid using herbicides on windy days and near bodies of water.
- Always wear a protective mask, gloves and long sleeves.
- Make sure children and pets are indoors when you spray herbicides.

Agrotechnology is an eclectic as well as focused journal intending to publish high quality manuscripts from basic, fundamental, applied research developments in Agrotechnology. Agriculture comprising various forms of ecosystems of late, has witnessed some kind of uncertainty on account of shifting weather. This has emerged as a major challenge, and need greater scientific interventions than ever before to inflict the desired resilience in crop raising and keep the uninterrupted journey of agricultural progress which must feed teeming billions. Journal expects authors and researchers to submit their articles in the areas but not limited to Agriculture, Seasonality, Farm equipment, Agricultural practices, Genetic engineering, Bt Crops, Tissue culture, Advanced Agriculture technology, Advanced Agriculture machinery, Agrotechnology, Modern farming technology, Advanced methods in agriculture.

Special issue is organized by **Dr. Saeed El-Ashram** and **De la torre llorente**.

Special issue guidelines

Submission Process

- Special issue articles can include both original unpublished research articles and review articles related to the specific theme.
- Manuscripts will be accepted for publishing in the special issue only after getting approved by the peer review committee [selected by the guest editor(s)].
- All the articles in special issues should strictly adhere to journal style and formatting.
- Each special issue can be created with 10-15 articles.
- All accepted manuscripts can be submitted online via <https://www.longdom.org/submissions/agrotechnology.html>

- Submission should be accompanied by a cover letter with reference to the concerned special issue theme.
- Accepted manuscripts submitted before the deadline will be published within the given timeframe for the respective journal publication.

Once accepted and published, all special issues will be released under an open access system through Longdom Publishing SL and will be freely available for reading, downloading, and printing.
