

## Past Conference Report of International Conference On Crystallography and Structural Chemistry

Maura Malinska

University of Warsaw, Poland

The International Conference on Crystallography and Structural Chemistry 2020 was hosted by Allied Academies during August 31 in Barcelona, Spain through webinar on the theme “Expanding the Novelties in the field of Crystallography”. This event will focus on Application of Modern Chemistry, Advanced Spectroscopy and variety of Crystallography Sessions including Chemical, Crystallography in Biology, Electron Crystallography, Crystallography Applications through invited plenary lectures, oral and poster presentations of unsolicited contributions. The conference was embarked with an opening ceremony followed by a series of the speech delivered by both prestigious delegates and members of the Keynote forum and speakers. The adepts who proclaimed the theme with their outstanding talk.

We would like to thank keynote speaker, speaker, Delegates, our supporting media partners and sincere thanks to our Organizing committee members for their support and assistance towards the success of Crystallography 2020, we value your time and expertise with us.
