

## Your future role in the realm of exponential organizations

**Niki Ernst**

IACy, USA

### Abstract

Technology is evolving at exponential pace and so do the world's biggest challenges. We are looking into an era of big players going extinct. The next 5 years will see up to 2 Billion people getting laid off. Fundamental concepts of today's marketplace – like competition – will be irrelevant within the next 10-15 years. Stakeholders of the production business have responsibility to contribute to circular economy and stop accepting excuses. It is time to rewire mindset, vision and agenda. Areas of growth are ubiquitous. A lot of provocative thoughts but also the end of compromise is in sight.

### Biography

Niki Ernst has been working with TED as a global TEDxAmbassador from the very early years of TEDx as a mentor, coach, and speaker, host, involved in over 100 TEDx events. In 2015 he joined Singularity University as faculty coach. He is bilocal in Vienna and San Francisco and home in both cultures: an innovation driven foresight mindset in Silicon Valley and the value driven, cautious “alterters” in Europe.
