

Insight of Eye Diseases and Disorders

Vijay Pai*

Department of Ophthalmology, Kasturba Medical College, Manipal University, India

ABOUT THE JOURNAL

On behalf of the Board of Journal of Eye Diseases and Disorders (JEDD), I am pleased to present the Volume 5 Issue 5 of the journal. Our Journal was organized in the year 2016, with 1 issue, 2017 with 1 issue, 2018 with 3 issues, 2019 with 3 issues, and 2020 with 5 issues every year and was running successfully since then. This is a peer reviewed and an open access journal which reflects all types of articles. Our articles include original articles, full-length research articles, critical reviews, case reports, mini reviews and short communications. The main objective of this journal is to invite publications from various streams of research which would help in the growth of our journal.

The journal has been achieved a lot in these 5 years by the constant encouragement and support given by the board members. JEDD journal is running successfully with the utmost coordination of board members, readers, researchers and reviewers. Our journal is indexed in Google scholar, Index Copernicus, CNKI and other databases. This journal follows double blind peer review process in which the details of authors were not revealed to each other. The journal homepage itself gives the authors a complete knowledge of the journal. Authors can easily submit their manuscripts through the homepage itself. They can check every aspect of our journal in the homepage. Users can check the aims and scope, advertising, indexing and archiving, table of contents, submit paper, track your paper, funded work, editorial panel, instructions for authors, submit manuscripts, in press, current issue, archive and special issues.

Journal of Eye Diseases and Disorders caters to the needs of ophthalmologists, retina specialists, endocrinologists, clinical practitioners, academicians, researchers and students that are keen on the latest developments in this field. The journal encourages manuscript written following the standard research methods as research articles, review articles, case reports, short communication and editorials.
