

Conference Announcement on 2nd Euro Sports Medicine-Fitness and Physiotherapy

David O. Draper

We are pleased to welcome you to the "2nd Euro Sports Medicine-Fitness and Physiotherapy" after the successful completion of the series of [Euro Sports Medicine](#) Congress. The congress is scheduled to take place in the beautiful city of London, UK, on July 20-21, 2020. This Euro Sports Medicine 2020 conference will provide you with an exemplary research experience and huge ideas.

The perspective of the [Euro Sports Medicine](#) Conference is to set up Sports Medicine research to help people understand how treatment techniques have advanced and how the field has developed in recent years.

[Euro Sports Medicine](#) is a branch of medicine that deals with physical fitness and the treatment and prevention of injuries related to sports and exercise. Sports medicine physicians have completed medical school, specialized in residency training, and then specialize further in sports medicine or 'sports and exercise medicine'. Specialization in sports medicine may be a doctor's first specialty. It may also be a sub-specialty or second specialisation following a specialisation such as physiatrist, family medicine, paediatrics or orthopedic surgery.

Sports injuries are commonly caused by overuse, direct impact, or the application of force that is greater than the body part can structurally withstand. Common injuries include bruises, sprains, strains, joint injuries and nose bleeds. Several surgical procedures in sport include repair to damaged cartilage and ligaments in the knee (especially cruciate ligament tears), AC shoulder injuries, dislocations and tendonitis. Surgery can usually be used to repair damaged soft tissue, align bones and re-position joints [Euro Sports Medicine](#).

The procurement of organs for injuries involves the removal of organs from the bodies of the deceased. This removal must comply with legal requirements, including the definition of death and consent.

To enhance the field and make people aware of it. The organizing committee decided to hold a conference. [Euro Sports Medicine](#) is one of the fast growing and developing areas of injuries.

People who have missed attending the past conference are most welcome to present your research ideas at the 2020 [Euro Sports Medicine](#) conference. This conference will help you improve networking with eminent people in the field of Surgery.
