

## Conference Announcement on Current and Future Trends in Surgery

M. Azfar

We are pleased to welcome you to the "Current and Future Trends in Surgery" which is scheduled to take place in the beautiful city of [New York, USA](#), on April 27-28, 2020. This Future Surgery 2020 conference will provide you with an exemplary research experience and huge ideas.

The perspective of the [Future Surgery 2020](#) Conference is to set up surgery research to help people understand how treatment techniques have advanced and how the field has developed in recent years.

Surgery is a part of medical procedure that is considered with the treatment of wounds or injuries, diseases and different issue by manual and instrumental methods. It involves in the management of acute injuries. It can include cutting, rubbing, suturing, or generally physically changing body tissues and organs.

Some common type of surgeries are Appendectomy, Breast biopsy, Carotid endarterectomy, Cataract surgery, Cesarean area, Tonsillectomy, and some surgical procedures are Elective surgery, Exploratory surgery, Minimally-obtrusive surgery, Amputation, Laser surgery, Robotic surgery. Surgery more often than not ranges minutes to hours, yet it is regularly not a progressing or occasional kind of treatment.

The act of surgery is usually called an operation or a surgical procedure, to identify it from surgery as a medical specialty. It is a specific form of treatment

that uses surgical instruments and is usually performed by a team consisting of surgeons, surgeon's assistant, anaesthesiologist, surgical nurse, and a surgical technologist.

Different procedures call for different methods of pre-operative preparation and care. Before go to a surgery, the patients first have to undergo a medical examination, after which they are rated using the ASA physical status classification system.

To enhance the field and make people aware of it. The organizing committee decided to hold a conference. [Future Surgery 2020](#) is one of the fast growing and developing areas of surgery.

People who have missed attending the past conference are most welcome to present your research ideas at the Future Surgery 2020 conference. This conference will help you improve networking with eminent people in the field of surgery.
