

# Conference Proceedings: “16<sup>th</sup> International Conference on Structural and Molecular Biology”

Rebecca Williams\*

*Managing Editor, Journal of Membrane Sciences and Technology, Spain*

## ABOUT CONFERENCE

The “16th International Conference on Structural and Molecular Biology” which will be held on October 12-13, 2021 in Manila, Philippines.

Structural biology congress 2021 contributes opportunities to Scientists, research scholars, students, delegates, and exhibitors to enhance their skills and improve quality of research. We welcome you to go along with us at the Structural Biology Congress 2021, where you will make certain to have an important involvement with both your colleagues and experts from around the globe. It helps you to implement practical, proven strategies to run your research more effectively, efficiently, and profitably. All individuals from the Structural Biology Congress 2021 sorting out council anticipate meeting you in Manila, Philippines.

The conference is going to be organized on the theme: “Investigating recent research and innovations in Structural and Molecular Biology”. This Structural Biology Congress 2021 goes to be the

most important and most promising international conference that specifically focuses on the Biochemistry by bringing all renowned researchers under one roof. This is often a 3-day multidisciplinary meeting covering all aspects of novel research and contributions within the field of structural biology and Molecular Biology.

## WHY TO ATTEND?

Structural biology and molecular biology conference focus on creating an international platform for the participants to share their knowledge and research work on the respective fields. It will include various tracks and sub-tracks within the structural and molecular biology field, which will further allow the participants to choose their respective tracks of their interests. The conference will give an opportunity to explore the topic with highly qualified researchers, scientists, doctors, professors and related people and associations who are involved in this field. It will be a great opportunity for the young researchers as well to learn and explore about their respective fields in structural and molecular biology.
