

Conference proceedings: “2nd World Congress on Polymers and Functional Materials”

Rebecca Williams*

Managing Editor, Journal of Membrane Science and Technology, Spain

ABOUT THE CONFERENCE

“World Congress on Polymers and Functional Materials” during September 28-29, 2021 in Auckland, New Zealand which includes prompts keynote presentations, Oral talks, Poster presentations and Exhibitions.

While much research and product development in industry is product oriented, it requires scientists with a grasp of the foundations of chemistry, creativity, the ability to work together, and enjoy seeing the practical applications of their work. Polymer Materials 2021 covers all the aspects of related field researchers, the forum of Scientists, and students from all corners of the globe, come together to discuss about polymer science and its advances.

Each session of the meeting will be included with expert lectures, poster and discussions, join us to design sustainable development processes, innovations by which and how these strategies drive new policies, advances the business and sustainability in drug production for further health care protection of lives. We are glad to invite you on behalf of organizing committee to join us, where you are the decision maker for future.

WHY TO ATTEND?

World Congress on Polymers and Functional Materials 2021 which is going to be the biggest conference dedicated to polymer chemistry focusing on "Recent Advancements and developments in Polymers" and provides a premier technical forum for reporting and learning about the latest research and development, along with discussing new applications and technologies. Events include hot topics presentations from all over the world and professional networking with industries, leading working groups and panels.

Meet Your Objective Business sector with individuals from and around the globe concentrated on finding out about Polymer chemistry, this is the best chance to achieve the biggest collection of members from everywhere throughout the World. Conduct shows, disperse data, meet with current, make a sprinkle with another product offering, and get name acknowledgment at this occasion. Widely acclaimed speakers, the latest methods, strategies, and the most up to date overhauls in Polymer science and Engineering are signs of this meeting.
