Ebrahim S. Mohammadi

Allied Academies organizes the 29th International Conference on Diabetes and Endocrinology on November 06-07, 2020 in Prague, Czech Republic. The goal of the conference is to create powerful networking with people from diverse countries and exchanges the information they have gained in the field of Diabetes and Endocrinology. After all, Diabetes is a disease that is growing progressively and has the potential value for the products in the world market to reduce the diabetes. The organization provides a great opportunity for the experts who pursue future in the field of Diabetes and shows various applications and possibilities to solve the current issues from different minds.

The most exciting part of the conference covers the scientific sessions, workshops and symposia. People from the industry also have a vital role to attend the conference to showcase, advertise and promote their products. Expos and Exhibitions make the conference livelier and more interactive. Highly affiliated people who attend the summit take the event into a quality international gathering platform to deliver the speech about their experience and accomplishments to the right audience. Allied Academies hope this conference can outrun the complications and limitations of skin related problems by analysing the current scenario of the field.

Previous international conference on Diabetes and Endocrinology organized in Frankfurt, Germany on November 29-30, 2019 was a productive and gratifying platform for the participants, based on the theme Exploring Advancements in Diabetes and Endocrinology. It wouldn't have been achievable to succeed without the organizing committee, speakers, delegates, YRFs and the Frankfurt venue staff members, and media partners. The scientific sessions of the conference include New Approaches to Manage Diabetes, Diabetic Complications on Related Fields,

Gestational Diabetes, Contemporary Researches on Diabetes, Advanced Technology and Tools for Diabetes, Case Studies and Reports, etc.

Each session contains sub-sessions that comprise most of the topics under Diabetes and Endocrinology. The research work of the speakers will come under either of these sessions to make the conference more organized and mastery. The Diabetes Congress 2020 extends the invitation to the highly affiliated professionals from the academic and business category and the young researchers as well to develop and build their career in the right path. The awards for oral presentations, posters and symposia mould the conference as a unique grouping for the experts across the world to provide the international forum to analyse the research results, new ideas and innovations. Knowledge seekers can contact the authorized personal for more details and about the registration process through
