About City:

Amsterdam is the capital and most famous city of the Netherlands and it is in the province of North Holland. Amsterdam is commonly referred to as the "Venice of the North" because of its large number of canals which are considered as a UNESCO World Heritage Site. As the financial capital of the Netherlands and one of the top financial centres in Europe, Amsterdam is treated as an alpha world city by the Globalization and World Cities (GaWC) study group. The city is also the cultural centre of the Netherlands. Many large Dutch organisations have their headquarters there, including Philips, AkzoNobel, TomTom and ING. Also, most of the world's largest companies are based in Amsterdam or have established their European headquarters in the city, such as leading technology companies Uber, Netflix and Tesla. In 2012, Amsterdam had ranked the second best city to live in by the Economist Intelligence Unit and 12th globally on quality of living for environment and infrastructure by Mercer. The city ranked 4th place globally as a top tech hub in the Savills Tech Cities 2019 report, and 3rd in innovation by

Australian innovation agency the Famous Amsterdam residents consists of the diarist Anne Frank, artists Rembrandt and Van Gogh, and philosopher Baruch Spinoza.

Market Analysis:

The ophthalmology market is prospering globally due to an increasingly aging population and its subsequent impact on the eye care industry. Due to the increasing number of individuals suffering from eye disorders, there will be an escalation in demand for surgical, diagnostic, and vision care devices. This is the important factor that will propel the growth of the global ophthalmology devices market, which has expected to grow USD 17.6 billion between 2018-2022.

Revenue in the Eyewear market of Europe amounts to US\$40,197m in 2019. The market is expected to rise annually by 1.4% (CAGR 2019-2023). When globally compared, most revenue is generated in United States (US\$32,288m in 2019). According to total population figures, per person revenues of US\$47.39 are generated in 2019. Spectacle Lenses, Sunglasses, Eyewear Frames, Contact Lenses.

18.1% (n=13) for cabbage, 16.7% (n=9) for carrot, 9.6% (n=7) for cucumber, 8.3% (n=3) for tomato, 12.5% (n=5) for coriander, 13.3% (n=6) for radish and 3.3% (n=1) for chilly (Table 2). Maximum incidence is observed in cabbage followed by carrot and radish and minimal is observed in chilly. Low incidence of E
